

Date: Thursday, 16-Jan-25 at 1.45 PM on ZOOM

Agenda: Demo Walkthrough of the eCommerce Web Application shop.nutricharge.in

Attendees: Vishal & Hiren from Thinkinno, Pravin, Geetanjali & Nitish from Trophic Wellness

Points Discussed:

1. The pricing can be set at the product level when there are no variants available. If a variant is available then the pricing should be set at the variant level only. For example, one book in only one language can be set at a product level. But if the same book is available in English and Marathi then two variants will be created “English” and “Marathi” and the separate pricing will be set for English and Marathi. At any point in time, there will never be a situation when the pricing is set at a product level and at a variant level.
2. Similarly to the pricing, if the product has no variants then the images will be uploaded at the product level but if the variants are available then the images will have to be uploaded at the variant level. at any point in time, there will not be a situation where the images are uploaded at a product level and at a variant level.
3. There will not be a concept of sets like the tools set 1 Having the multiple books of multiple languages. the admin will not have any facility to create a set by selecting the products and product variants.
4. The delivery address that is displayed on the cart page will have an option to change it. Clicking on the change address link will open the profile page for the user to update the address. There will only be one address for one user at a time unlike Amazon.in where one user can have multiple delivery addresses.
5. Cash on delivery is not going to be an option in the system and the same will not be applicable on the payment page.
6. The landing page will show the first slider similar to the page nutricharge.in and after that the list of products will be displayed.
7. The sequence in which the products will be displayed will be set by admin in the product master.
8. The system is also required to send an SMS and an email when the order is placed or when the expected delivery date is updated.
9. Since the shopping module will be displayed on click of a button like “Shop” on the site Nutricharge.in, the look and feel of the shopping module will be as per the current colors of Nutricharge.in, and Trophic wellness will revert in case any changes are required.

Deliverables by Thinkinno Technologies:

1. Update the mock-up based on the discussions
2. Hiren will share the demo links on 16-Jan-24 with Pravin to be shown to Manisha
3. Hiren will share the Order Excel format for Geetanjali to confirm.
4. Thinkinno will work on the additional efforts for the development of updating the delivery tracking code and tracking link as an Excel upload.
5. The image dimensions of the product

Deliverables by Tropic Wellness:

1. Pravin will provide whether RCM should be mandatory or not.
2. Pravin will revert on whether the login should be RCM ID, Email or Phone.
3. Pravin will revert about the forgot password mechanism.
4. Nitish will give the SMS API details later on/after 23-Jan-25
5. Provide the product images as per the dimensions
6. The content for the Privacy policy, terms & conditions, cancellation, and refund policy.
7. Based on the Minutes of the meeting and the mock-up screen, Pravin will share the feedback and approval to go ahead with the development.
