PEDESTRIAN SPEEDSTILE

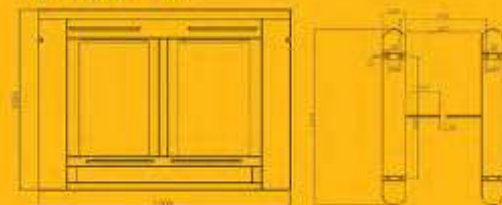

RMC
PSS
160

FEATURES

Aesthetic Design
24 V DC Motor
Stainless Steel Construction
MCU up to 5 million cycles

DIMENSION

PEDESTRIAN SPEEDSTILE

**RMC
PSS
102**

Swing Type Speedstile is ergonomically and aesthetically & built thus offering alluring design of sophistication. The designed concept is such that it offers the scope for customization depending on the application that it is desired for. The extent is more than explicit to engage with its customer's ideas and an architect's desire to deliver complimenting designs to their architecture is in its complementing products and solutions

PEDESTRIAN TRIPOD TURNSTILE

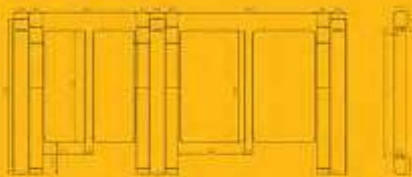

**RMC
PTT
200**

These compact design tripods offer an adequate entrance control facilitation where the basic of security are essentially practiced . Drop arm function with automatic restoration add to the ease of own ship . These are widely used in BPL's , Controlled entrance to factories and small establishments etc.

FEATURES

- Sleek Design
- 24 V Brushless DC Motor
- Stainless Steel Construction
- MCU up to 10 million cycles

DIMENSION

FEATURES

- Compact Design
- Motorized with precise position feedback
- Automatic Drop Arm feature
- Stainless steel construction

DIMENSION

PEDESTRIAN RETRACTABLE FLAP GATE

**RMC
PRS
30E**

Retractable flap barriers with innovative oval design are the front runners when it comes to equip costumer premises with basic luxury. These flap barrier offer high throughput in access controlled environment and sophistication.

VEHICLE BOOM BARRIER

**RMC
PARKAR**

The Vehicle Barrier Gate is very simple yet elegantly designed with dual tone Powder coat option of yellow and grey that makes it stand out in bright as well as poorly lit dark environment. It stands attentive for multiple operations and vehicular access control.

FEATURES

- Appealing Design
- Choice of Glass,PII flaps
- Stainless Steel Construction
- 24 V D.C. MOTOR

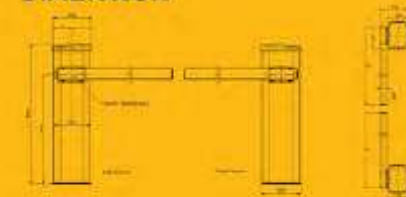

DIMENSION

FEATURES

- Sleek Design
- Low power consumption
- Value for money
- 24 V D.C. MOTOR

DIMENSION

VEHICLE BOOM BARRIER

**RMC
ENTERPRISE**

These barriers are designed to offer fastest opening/closing times for making effective use of infrastructure in today's ever-changing times. From Tolls to ETC lanes, Markets to Movie halls these barriers are ideal choice for customers where time is money.

VEHICLE BOLLARD

**RMC
HRB**

The placement of crash-rated bollards requires careful consideration & Planning and deep understanding of the perceived threats. These are dictated by the location, type of facility secured etc.

FEATURES

- Fastest amongst competition
- Unmatched features
- MCFE of atleast 10 million operations
- Long lasting

DIMENSION

FEATURES

- Choice of crash ratings
- Individual power packs
- Emergency fast operations
- High efficiency

DIMENSION

SCANNING BAGGAGE SCANNER

**RMC
500
300**

The Ravel Movement Control's Article Scanners are simple, elegant and thoughtfully designed to address scanning of baggage of varied sizes and dimensions.
