# Project Information

Application Type: Web App & Whatsapp Chat bot development

Technology: Dot Net (MVC), JavaScript, jQuery, Angular JS & MySQL, & Flutter

Development Includes, Training, Client Testing Support & Defect Fixing Support. Payment Terms: 50% Advance, 40% on Delivery, 10% on Final Deployment Live Support – Two Weeks – Post that AMC will be applicable.

\*If Applicable - Any other third-party cost like Whatsapp integration, SMS integration, payment gateway charges, server cost, third party tools cost etc are not included in the cost and will be paid by the client.

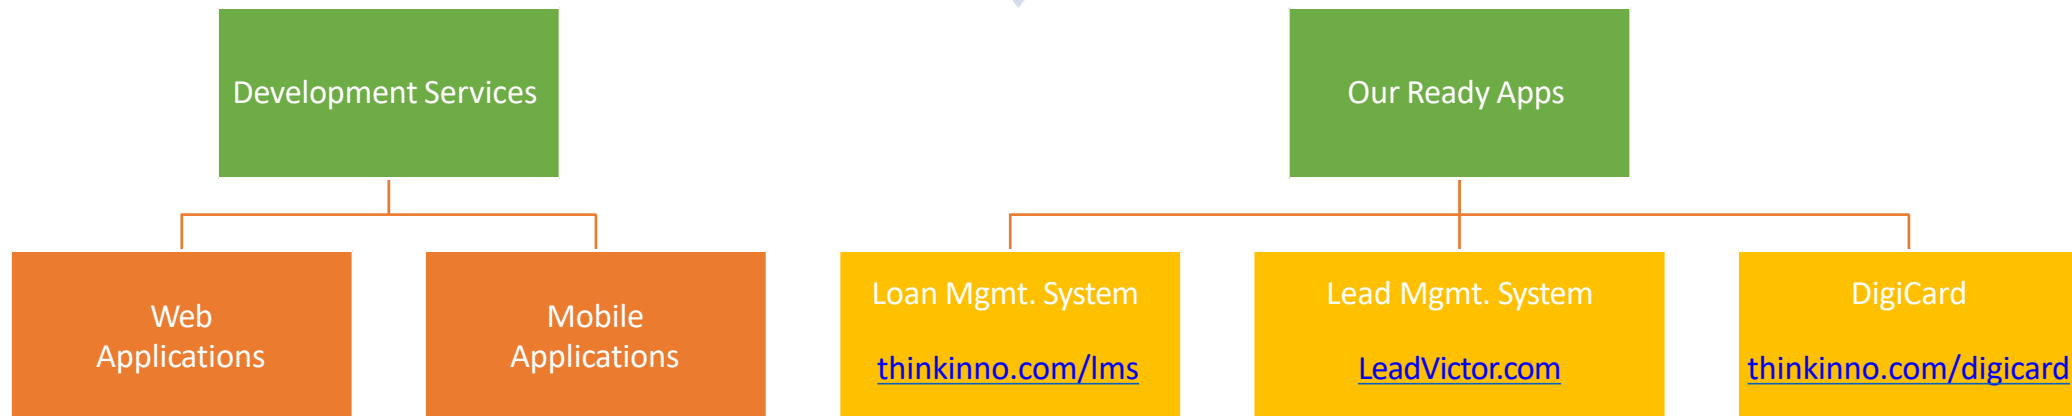

\* Any new feature if required that is not mentioned in scope will incur additional efforts & costs.

\* Will need one-two week lead time to plan & start the development.

#	Milestones	Description	Delivery from Thinkinno	Confirmation from NutriCharge
1	Features List Detailed	Requirement gathering & clarifications		
2	Mock-up Screens	User Interface Development		
3	Development	Architecture Design		
4	Development	Test Cases Creation & Validations		
5	Development	Development		
6	Development	Unit Testing		
7	Development	Integrated Testing		
8	Development Set 1	Deployment for Client		
9	Development Set 2	Deployment for Client		
10	Live	Make it live		

For faster delivery we have divided the project in two sets. For a successful project completion, it will be important for client to provide timely payment, response, clarification, confirmations and approvals.

Any delay may impact the timelines. Any addition of a new requirement would also impact time & cost.

**Mr. Craig Hartman**

CEO / Plansmith Corporation (USA)
